CAREER OBJECTIVE

Junior Front End developer with Vuejs and Reactjs experience looking to continue developing my skill set to build a beautiful user interface and provide a quality user experience.

PROJECTS

PearTV Website

- Determining the structure, design and functionalities of the website using React.js and Styled Components
- Utilized TMDB API service alongside RESTful API calls to store data in MongoDB backend
- Worked with the React.js ecosystem, including React Router, Redux and Hooks and libraries including ImmutableJs and Bootstrap

PearMusic Mobile Web App

- Developed user-facing applications using Vue.js, SCSS
- Worked with the Vue.js ecosystem, including Vue CLI, Vuex and Vue Router
- Utilized modern development tools, like Babel, Webpack, and Git
- Optimized the web design for smartphones

Bushland Scouts Website

- Developed user-facing applications using Vue.js, SCSS
- Utilized RESTful API calls to store data in MySQL backend
- Worked along with designer and data analysts to get feedback from and build solutions for users

WORK EXPERIENCE

Web Developer

Monash University Industry Experience Program
Aug 2020 – Nov 2020

- Worked on building new Vue based components for the single-paged app, which aim to help young children increase awareness of bushland preservation
- Worked within an agile team and helped prioritize and scope feature requests
- Designed, built, and edited website UI with Procreate, Sketch and Mockingbot that enhances user experience
- Used: Knowledge of RESTful APIs, Node.js, Express, and MySQL
